

**It's Not "Just"  
Business -  
It's A  
Partnership**

**PLM/PDM Services**

## **Highlights**

- A global company with over a decade of offshore development experience
- US-based with operations in India and across the globe
- Strong PDM/PLM foundation built on over a decade of engineering expertise combined with experience implementing global enterprise solutions
- Proprietary 7-step implementation methodology to enhance engineering productivity
- Data migration experience from disparate tools and platforms
- Software development background allows for customization to meet specific requirements
- Integration of technologies to other enterprise applications such as ERP and CRM
- ISO 9001:2000 certified with a focus on the future through continuous improvement initiatives
- Stringent security procedures that ensures all confidential information is under maximum control and protection including customer drawings, models and documents
- Strict adherence to intellectual property rights

# PLM/PDM Services

Barry-Wehmiller International Resources (BWIR) is part of the consulting group of Barry-Wehmiller Companies, Inc. a diversified company founded in 1885. With headquarters in St. Louis, Missouri and primary operations in India, BWIR offers the combined benefits of the proximity and dependability of a US company with the affordability of distributed operations.

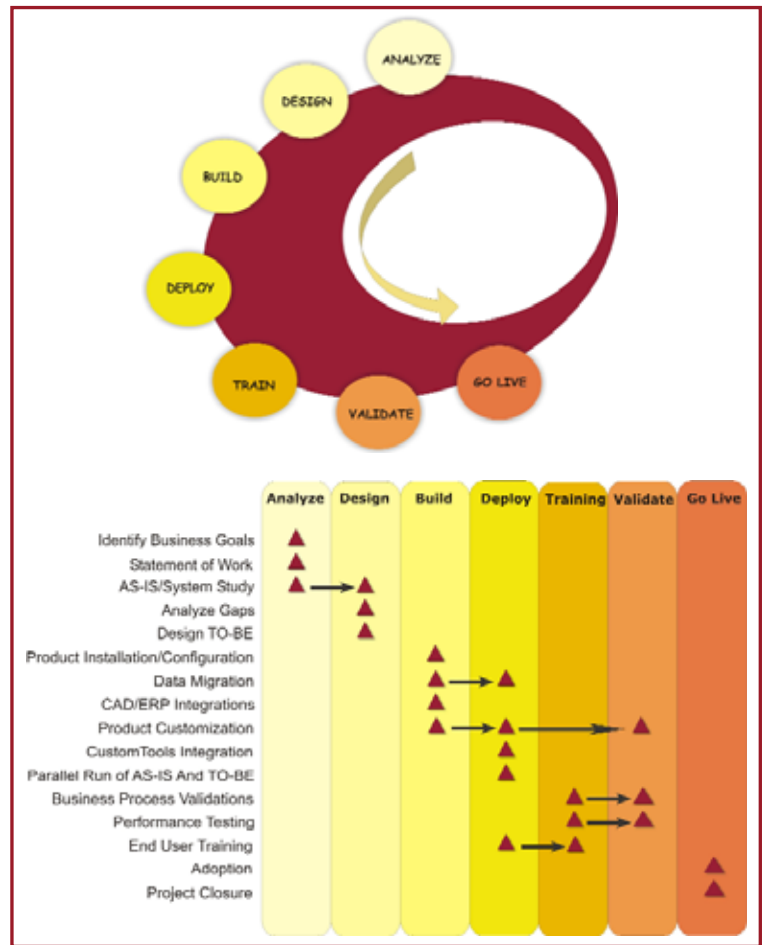

BWIR's foundation in the PDM/PLM space is built on 12 years of experience in engineering services combined with our expertise implementing enterprise solutions across the globe. BWIR's unique strengths include:

- Legacy Data Migration
- Enterprise Systems Integration
- Customization
- Enterprise Implementation - Quick Start Approach
- Enterprise Implementation - Phased Approach
- Process Re-engineering
- Global Deployments
- Offshore & Onsite Implementation Support

## Service Offerings:

BWIR's offerings cover a broad spectrum of services- both functional and technical.

- 1. Implementation Services:** BWIR's implementation methodology ensures improved engineering productivity. This proprietary 7-step EPDM implementation process has a proven track record.
- 2. Migration Services:** One of the greatest challenges to a successful EPDM implementation is the migration of legacy CAD models and drawings as well as the meta data to EPDM. BWIR's strong understanding of the source data allows us to effectively consolidate the information for greater efficiency.

- 3. Customization Services:** BWIR's functional and technical expertise allows us to meet your unique requirements. Customization can start with expert configuration of the product and additionally involve customized coding using the EPDM API to meet high value requirements. In addition, BWIR's consultants can assist our customers in making the right choice between a centralized, distributed or federated deployment of the technology.
- 4. Integration Services:** Creating seamless business processes in your organization requires effective integration of PDM-CAD-ERP, extended enterprise systems, external workflows and other third-party solutions. BWIR recognizes the business need in this area and has demonstrated strengths in providing a comprehensive suite of integration services.

## BWIR's SolidWorks EPDM Expertise:

BWIR is committed to the EPDM platform and has mastered the following skills:

1. Configuring users, groups, workflows and permissions
2. Integrating SolidWorks EPDM with ERP Systems such as Infor XA , SAP and TCM
3. Integrating with other CAD tools including SolidEdge, Pro-E, AutoCAD and CADRA
4. Develop add-ins for incorporating custom requirements
5. 24/7 global post-implementation support
